### PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.88) specializing in AI-powered and full-stack web application development with Python and JavaScript. Has independently designed, built, and deployed multiple production applications, including an AI interview-preparation platform and a responsive portfolio site. Skilled in cloud deployment, version control, and modern software engineering practices, with a strong record in competitive programming. Seeking an AI Application Developer role to apply hands-on project experience to real-world engineering challenges.

### TECHNICAL SKILLS

**Languages:** C, C++, Python, Java, JavaScript, HTML5, CSS3

**Tools & Platforms:** Streamlit, Git & GitHub, Vercel, VS Code

**Concepts:** Full-Stack Web Development, AI-Powered Application Design, Cloud Deployment, Data Structures & Algorithms, Version Control / Collaborative Workflows

### EXPERIENCE

#### AI & Full-Stack Development — Independent Projects

2024 – Present

- Designed and developed AI-powered web applications using Python and Streamlit, from concept through deployment.
- Built and deployed responsive portfolio and interview-preparation platforms, focusing on usability and performance.
- Implemented front-end interfaces with HTML, CSS, and JavaScript, ensuring cross-device responsiveness.
- Managed end-to-end deployment workflows on Vercel and Streamlit Cloud.
- Applied Git and GitHub for version control and collaborative development practices.

### PROJECTS

#### AI-Based Social Media Sentiment & Trend Analysis Platform — Women Safety (Capstone Project)

*Technologies:* Python, BERT, VADER, TextBlob, Firebase, Twitter/Reddit APIs, HTML/CSS/JS, Vercel | [capstone-project-220-batch.vercel.app](https://capstone-project-220-batch.vercel.app)

- Collaborated in a 5-member team to build a pipeline that collects and analyzes real-time social media data to detect sentiment trends related to women's safety.
- Applied BERT transformer models alongside VADER and TextBlob for NLP-based sentiment classification, achieving ~91% accuracy on labeled datasets.
- Built and deployed an interactive dashboard on Vercel to visualize live sentiment distribution and trending topics.

#### Personal Portfolio Website

*Technologies:* HTML, CSS, JavaScript, Vercel | [badamsudheerreddy-portfolio.vercel.app](https://badamsudheerreddy-portfolio.vercel.app)

- Designed and developed a fully responsive personal portfolio website to showcase projects and skills.
- Deployed and maintained the site on Vercel with a focus on clean, modern UI.

### EDUCATION

#### KL University, Vaddeswaram — B.Tech, Computer Science and Engineering

2023 – Present | CGPA: 8.88

#### Sri Chaitanya Junior College, Vijayawada — Intermediate (MPC)

2021 – 2023 | Score: 882/1000

#### Sri Chaitanya Techno Curriculum, Reddypalem, Guntur — SSC

2020 – 2021 | Score: 600/600

### CERTIFICATIONS

- AWS Certified Data Engineer – Associate
- Certified Essentials RPA Professional – Automation Anywhere
- Microsoft Certified: Azure Fundamentals – AZ900

### ACHIEVEMENTS

- Active competitive programmer on HackerRank and CodeChef.
- Built and deployed multiple AI-powered and web-based applications independently.
- Demonstrated strong, consistent interest in full-stack development and emerging AI technologies.

### LANGUAGES

English — Professional Working Proficiency | Telugu — Native Proficiency | Hindi — Conversational Proficiency
